Box Contents

2x Bike-Comm M1 Headsets	
2x Mounting sets	
2x Speaker microphone sets & Sticky pads	
2x AC / USB Chargers	
2x 2.5mm-3.5mm Audio adaptors	

Charging your unit

Your Bike-Comm M1 contains a high density Polymer Li-Ion Battery.

Charge the intercom for at least three hours before first use.

- Insert the 2.5mm jack into the socket on the intercom
- Insert the USB connector into the AC charger or a free port on your computer
- The red LED on the intercom will light up while charging.
- When charging is completed the LED will switch off

Tip: To protect your battery life please charge the Bike-Comm M1 every month

Attaching to a Helmet

- Find your preferred position to mount the intercom on the **left** side of the helmet
- Insert the clip between the shell and foam liner^[1] and secure to the mounting plate^[2] with the supplied screws
- Slide the intercom onto the mounting plate

Positioning the Speakers & Microphone

To achieve the best sound quality; the speakers must be placed directly in line with your ears

- Put your helmet on but do not close it
- Slide your thumb inside the helmet until you feel your earhole.
- Close your hand and mark the thumb's position
- Mount a velcro pad to the centre of this position.
- Repeat for the other ear
- Position the microphone in front of the lips and secure with a velcro pad.
- Plug the speakers into the intercom

Correct positioning of Microphone

Tip: The speaker for the left ear has a shorter wire than the right hand wire

Pairing the Bike-Comm with Bluetooth devices

Pairing to a phone:

- Press the reset button on the intercom for 1 second
- Place the intercom into pairing mode by holding the power button until the red and blue LED's begin to flash alternately
- Search for a bluetooth device and select "MOTORPHONE"
- When a password is requested input "0000" [Four Zeros]
- If pairing is successful the blue LED will flash every five seconds

Operation

- Press the power key for six seconds to connect to your phone and accept the connection
- The blue LED will begin to flash slowly when the connection is made
- When a phonecall is received the headset will automatically answer after three to five seconds
- To end a call; press the Phone/Play key
- To reject a call; press the Phone/Play key for two seconds
- To dial the last number called; press the Phone/play key for two seconds

Remember to test your connections before taking the Bike-comm out on the road.

Pairing the Bike-Comm with Bluetooth devices

Intercom function

Each Bike-Comm Unit can pair with up to five other Bike Comm headsets. By assigning each one to a rider key. Make sure that you only have two units switched on at a time to ensure correct pairing.

- Push the reset button on both units for one second
- Choose which Letter [A-E] you will assign the other headset to
- Push and hold the letter key until the red and blue LED's flash.
- If pairing is successful, the blue LED will flash slowly
- To talk with another user press the corresponding key for one second.
- Push the same button to end the call.

Examples:

- Push and hold the A key on both headsets to assign each user to Rider A
- Push and hold the B key on two headsets to assign a user to the B key

Headset	1	2	3	4	5
1:					
2:					
3:					
4:					
5:					

Tip: Use a table to keep track of who is assigned to each intercom key.

Pairing the Bike-Comm with Bluetooth devices

Listen to Audio with A2DP Bluetooth profile

- Pair your Bluetooth Audio with the Bike-Comm by holding down the Phone/Play Key until the Blue & red LED's flash
- If pairing is successful the blue LED will flash Slowly
- Push the Phone/Play key so start & stop audio

Tip: Use the supplied audio cable to connect your mp3 & GPS to the Bike-Comm

Trouble Shooting

Bike-Comm dead	Low battery, charge for 3 hours.
Bike-Comm loses connection	Push the reset button then re-connect. Can be caused by areas of high Radio energy
No audio	Check to see if all cables are connected. Test with another speaker set to confirm operation.
Feedback through speakers	Reduce the volume or move the microphone away from the speakers
Cannot connect to phone	Test with a different model of phone to see if you have a compatible model
